2. LED on ON-OFF and RGB control
3. Air Conditioners
4. Security Access Control, CCTV and Intrusion Alarm System.
5. Entertainment: TV, Audio

### PurpleArrow VELVET Features

• **Retrofit:** Wireless automation is an ideal way to start making simple changes that lead to better efficiency, without making significant capital

• **Ongoing Enhancements:** Purple Arrow brings lighting, temperature, and technology together so you can get accurate data and manage energy usage across the entire building.

• **New Construction:** Optimal efficiency can be achieved when all building systems are integrated by Design from the start of the project. Only then can disparate systems operate together as a single system, and when the building is complete, occupants can monitor, manage and control throughout the building from a dashboard.
