Fleet Management

Integrated security management delivered remotely to and from the field

Trusted Security and Surveillance Partner

Purple Arrow Consultancy Services Pvt. Ltd.'s OEM partner has more than a decade of experience as a trusted security and surveillance partner and advisor, with over 1,500 systems in 30 states. From K-12 education and campus safety to critical infrastructure, Purple Arrow Consultancy Services Pvt. Ltd. develops systems and strategies tailored to your security and surveillance needs.

For fleet management and remote device recording Purple Arrow Consultancy Services Pvt. Ltd. understands the need for durable and reliable solutions. We have designed systems to range from one camera on an emergency management vehicle with 3G/4G access for long range field reconnaissance, to an entire fleet of transportation vehicles with sensors arrays designed to withstand vandalism, extreme environments, and the general shock and wear of air, road, water, or rail travel.

Complete with a software solution designed for easy access and remote video retrieval that is cleanly integrated with your standard Purple Arrow Hawk VMS Solution, you can feel at ease in communicating procedures with your staff and ensuring your video is always accessible and can be archived securely.

Highlighted Features and Functions for Purple Arrow Hawk Fleet Management

Web-based Interface

- Enterprise-level access from within Purple Arrow Hawk VMS for a consolidated view of the entire fleet

- Remote power on/off with wireless download to a network-based solution

- Preserve bus incident recordings in secure centralized repository for future review and evidence

- Remote configuration and viewing from ANY workstation or server

- Dynamic health and status reports

- Access to up to 4 video feeds and 2 audio feeds while vehicle is in route

Hardened Remote Controllers

- Robust wireless infrastructure to meet demanding environments

- Fast-on auto record design

- UPS configured for clean power and 24/7 uptime

- Strategic design and placement of enclosure for limited impact from environment or accident with an enhanced shock absorption mechanism

- External Microphone and embedded GPS

- Efficient Compression for more storage on the unit

Anticipate Smart Growth

Technology and Security professionals scan the landscape for solutions that minimize future costs and operational hurdles. Purple Arrow Consultancy Services Pvt. Ltd. understands these challenges. Whether starting new in our entry level or enterprise class platforms, Purple Arrow Hawk VMS can grow to unlimited cameras and users. Leveraging your investment in network and server infrastructure, Purple Arrow Hawk VMS adapts to your environment.
